

A top-down view of a car chassis. The front end (top of the image) features a blue front bumper and blue front fenders. The front suspension components, including the upper control arms, lower control arms, and steering knuckles, are highlighted in blue. The front wheels are also blue. The rear end (bottom of the image) features a red rear bumper and red rear fenders. The rear suspension components, including the upper control arms, lower control arms, and steering knuckles, are highlighted in red. The rear wheels are also red. The central chassis components, including the engine, transmission, and drivetrain, are shown in white. The car is oriented horizontally, with the front to the left and the rear to the right.

- Rubbing or slight appearance defect
- Quick repair
- Paint
- Panel paint
- Replacement
